Our 1938 Introductions

STEPHENSON'S GIANT

(See illustration on front cover)

*Winner of the Achievement Medal at Pomona for the
Best Three-Year-Old Undisseminated Seedling*

AN HONOR ROLL, DAHLIA

An informal decorative of light primrose yellow. A giant flower in both diameter and depth. The long, narrow petals curl back most gracefully towards the stem, completely covering it. A 12-inch bloom. A robust grower, with strong, wiry stems that hold the flower well above the foliage. The flower has substance, making it an excellent keeper and insect-resistant. This is an unusual characteristic in a flower of this delicate coloring.

Plants \$7.50 net

"ONE-GRAND"

A Semi-Cactus of Brilliant Canary Yellow Color

AN HONOR ROLL, DAHLIA

A 12-inch bloom on the best of stems and a splendid keeper. Pronounced by growers who have visited the gardens, "The best commercial yellow to date."

Roots \$10.00

Plants \$5.00

1938 Foreign Introductions

ADOLF MAYER

“CALIFORNIA’S FINEST DAHLIA SEED”

This seed is gathered only from the large exhibition-type dahlias. No others are permitted to bloom during seed time. The garden is planted to obtain the best possible crosses. We do not hand-pollenize, but use the bees to do this work. We believe there is no finer seed produced, and the many letters we have from our customers who order each year confirms this statement.

Dahlias grow readily from seed but do not reproduce the variety from which the seed was gathered. It is not easy to originate and establish a new variety, but IT IS a thrill to grow your dahlias this way, and always with the hope of success. The plants will bloom the first season and will produce a clump of roots for the next year's planting.

To quote from our correspondence:

"I had wonderful success with your seed last year. A commercial grower visiting my garden admired them very much and advised me to take good care of them. Some of the blooms were 10 to 12 inches across and very nearly all were double."

"I am shipping you some tubers of a very fine seedling to grow in California. The bloom is very large, of a semi-cactus type, pink, and as nearly as I can describe it would be a "Pink Satin." Has a good, strong stem. The finest pink I have yet seen."

"Last year we grew a dahlia from your seed which we think is very, very fine. A two-tone red and white. A red somewhat brighter than the Prince of Persia. A profuse bloomer and a very large flower. Always a tight center."

"Enclosed find picture of a ROSE PINK grown from your 1935 seed, and I hope to have enough to show at New York in 1938."

"I had wonderful blooms from your seed this past year, though I was a little late in planting. Only two were singles; of the others three or four were really outstanding, one a clear lemon yellow, and another a very dark red, almost black, but a beautiful live color. They were both about 14 inches across, the largest blooms I have had and I grow Murphy's Masterpiece, California Idol, Hunt's Velvet Wonder, and the rest."

FROM A GARDEN CLUB:

"The seedlings Mrs. — Obtained from your seed has been an inspiration to all of us."

JOIN THE

AMERICAN DAHLIA SOCIETY

We invite our friends and customers to join the American Dahlia Society and become a part of this great National organization whose interest is devoted solely to the improvement of the Dahlia.

The Quarterly Bulletin—a real Dahlia Magazine—gives all the up to date Dahlia news, information about, and illustrations of new varieties, the latest cultural hints and is a real worth while guide to any lover of Dahlias. The Bulletin alone is worth many times the cost of the annual dues.

Trial Gardens are maintained at Connecticut College, Storrs, Connecticut, and The Michigan Agricultural College, East Lansing, Michigan, where new varieties are tested and scored each year. A test garden is also maintained at Cornell University, Ithaca, New York, for research work on insect and disease control. Full reports from all these gardens are published from time to time.

Dahlia "fans" in every state of the Union and many foreign countries are members and frequently contribute news to the Bulletin. Membership includes admission, and the privilege of exhibiting at all our National exhibitions which are held each September in some National center.

Dahlia Plants

We highly recommend our dahlia PLANTS. They are grown from base cuttings under a controlled temperature of 65 to 70 degrees. They are well hardened off before ready to be set out, and will bloom the first year and about the same time as roots that have been planted two weeks earlier.

**DAHLIA GREEN PLANTS ARE READY FOR
SHIPMENT AFTER APRIL 15**

To our customers who visit the Gardens and take delivery on plants, we offer a collection rate on six plants or more, at a considerable saving. If you advise us of your selection, we will be glad to quote you prices.
